Description:

The Bus Tracker App is a mobile application that lets users **plan their routes, track buses in real time**, and **receive alerts** about delays or arrivals. It's like having a personal bus assistant in your pocket - helping you never miss your bus again.

Our main users are **students, employees**, and **daily commuters** who rely on public buses to travel. It's also helpful for **tourists** or anyone who is unfamiliar with local routes.

In many areas, bus services don't run on fixed schedules. People often wait without knowing when or if the bus will arrive. This app solves that problem by giving **real-time updates** and **smart planning tools**. It saves time, reduces stress, and makes public transport more reliable.

We can:

- ✓ See live bus locations
- ✓ Plan your trip
- ✓ Get alerts if there's a delay
- ✓ Avoid missing your bus
